

OARS Pellets

The OARS® Pellet is formulated with the OARS® acid removing chemistry proven to remove the organic acids that cause water repellency and localized dry spots. OARS® pellets will also increase water infiltration into difficult to wet areas thereby increasing the effectiveness of watering. The OARS® pellet provides a convenient way to apply OARS® chemistry for any hand watering or syring application.

AQUA-AID PELLET CHEMISTRIES

Five formulations that are designed to make hand watering more effective and longer lasting. AQUA-AID pellets are non-toxic to all types of turf, annuals, perennials or ornamental plants.

Aqua-Aid[®]

PENETRATING PELLET

- Helps wet hydrophobic soils
- Reduces hand watering
- Reduces water surface tension
- Increases water penetration

Aquifer[®]

HYDRATING PELLET

- Manages localized dry spots
- Reduces hand watering
- Long lasting soil penetrant
- Increases water retention

OARS[®]

LOCALIZED DRY SPOT PELLET

- Pellet formulation of OARS acid removing chemistry
- Proven to remove the organic acids that cause water repellency and localized dry spots

aquaMAXX[®]

ADVANCED KELP EXTRACT FORMULA

ROOT PRODUCING PELLET

- Formulated with auxins and cytokinins
- Encourages maximum root growth
- Provides maximum root density
- Reduces hand watering

Aqua-Root[®]

MICROBE FEEDING PELLET

- Formulated with humate and microbes
- Chelates and translocates nutrients
- High cation exchange capacity
- Increases water penetration
