

reDEWce™

Dew Suppressant

**START EARLIER,
PLAY LONGER**

The logo for reDEWce Dew Suppressant features the brand name in large, bold, yellow-outlined letters with a blue shadow effect. Below it, the words "Dew Suppressant" are written in a smaller, black, sans-serif font. The background of the logo is a blue, stylized shape resembling a splash or a drop.

reDEWce™

Dew Suppressant

reDEWce™ dew suppressant, canopy moisture inhibitor, is designed to control the formation and retention of moisture on turf from dew and frost. reDEWce will also allow for faster turf canopy drying after irrigation, rainfall or frost.

reDEWce will suppress dew formation on turf areas such as athletic fields, tees, greens and fairways. reDEWce is effective at concentration rates of only 0.2%. Apply reDEWce as a foliar spray with boom, handheld or backpack sprayers to wet area thoroughly. Allow treated area to dry completely before applying irrigation. If reDEWce is not allowed to thoroughly dry, applied irrigation or rainfall can remove reDEWce from the leaf blade decreasing efficacy.

Mowing frequency and turf growth rates are the principle factors which contribute or detract from the efficacy of reDEWce. Frequent mowing will remove leaf tissue previously treated with reDEWce, therefore lessening longevity. reDEWce is most effective during colder seasons when turf growth and clipping removal are lowest. Dew suppression will last for a period of 5 to 7 days depending on areas mowed.

- Reduces leaf moisture, reducing dew formation
- Drying time reduced after rainfall or irrigation
- Reduced turf canopy moisture lessens disease incidence
- Frost recovery times are reduced
- Reduced clumping when mowing
- Low rate effectiveness

COMPOSITION

reDEWce is formulated to reduce the accumulation of surface moisture on turf, including dew and light frost.

Active Ingredients:
Siloxane-copolymer

reDEWce Dew Suppressant is available in 30 and 1 gallon recyclable containers.*

*Check with your distributor for availability.

APPLICATION RATES

Golf, Sports Fields and General Turf Tank mix a 0.2% concentration of reDEWce. 25 ounces per 100 gallons (500 ml per 250 liters). Use 2 gallons of spray solution per 1000 sq. ft. (8 liters per 100 sq. meters).

Mixing Instructions

For best results, fill the tank 2/3 to 3/4 full with water and begin agitation. An anti-foaming agent may be required before adding a pesticide or reDEWce. Add pesticide as directed by pesticide label and continue agitation. Next add reDEWce and continue filling tank while maintaining agitation.
